

Fed up with heavy menstrual bleeding due to fibroids?

Now there is an **INCISIONLESS** fibroid treatment option.

Hysterectomy is NOT the only answer.

If you are one of the millions of women with uterine fibroids, you know they can cause heavy menstrual bleeding and long, uncomfortable periods.

Ask your doctor if the **SONATA TREATMENT is right for you!**

Sonata[®]
Treatment

Important Safety Information The Sonata System is intended for diagnostic intrauterine imaging and transcervical treatment of symptomatic uterine fibroids, including those associated with heavy menstrual bleeding. **Common Side Effects** include bleeding, spotting, cramping, post-ablation inflammatory symptoms, and/or discharge. As with any procedure, there are potential risks with this treatment such as skin burn and uterine perforation. Women who are pregnant, have a pelvic infection, are known to have gynecologic cancer, or have intratubal implants for sterilization should not have this procedure.
